

## Ministry of Environment and Forests

GOVERNMENT OF INDIA

### THE WETLANDS (CONSERVATION AND MANAGEMENT) RULES, 2010

#### Press Note

#### **New Delhi, December 2<sup>nd</sup> 2010:**

The Ministry of Environment and Forests today notified the Wetlands (Conservation and Management) Rules, 2010. These Rules have been drafted by the Ministry of Environment and Forests to ensure better conservation and management and to prevent degradation of existing wetlands in India.

Wetlands are critical for human development and wellbeing, especially in India where a large number of people are dependant on them for drinking water, food and livelihood. Despite their immense importance, wetlands are one of the most degraded ecosystems globally. Research suggests that over-exploitation of fish resources, discharge of industrial effluents, fertilizers and pesticides and uncontrolled siltation and weed infestation, among other reasons, have wiped out or severely damaged over 1/3<sup>rd</sup> of India's wetlands.

Wetland conservation has been accorded a high priority in India. Since 1985-86, the National Wetlands Conservation Programme of India has been financially supporting wetland conservation activities in nearly 115 wetlands all over India. India has also been an active member of the Standing Committee of the Ramsar Convention.

The Wetlands (Conservation and Management) Rules, 2010 is a positive step towards conservation of wetlands in India. "This is the first time that legally enforceable Rules are being notified for such eco sensitive areas in our country. This will go a long way in protecting our wetlands which are under severe threat" said Mr. Jairam Ramesh, Minister for Environment and Forests. "Separately we have also requested ISRO and other institutions to undertake a comprehensive mapping exercise delineating all the wetlands in the country" he added.

The Ministry of Environment and Forests, recognising the importance of having a legal framework for the preservation and management of wetlands in India, drew up a draft Regulatory Framework drawing upon the recommendation of a wide spectrum of experts and stakeholders. The draft was also made available for public comment on the Ministry's website and all comments and suggestions received from the general public with regard to the draft framework were considered, and where possible, included in the Wetland Rules.

Under the Rules, wetlands have been classified for better management and easier identification. Wetland Regulatory Authorities and Appraisal Committees have been set up at the Central, State and District levels to ensure proper implementation of the Rules and perform all functions for management of wetlands in India. Apart from necessary government representatives, each of these bodies shall have a number of expert members to ensure that wetland conservation is carried out in the best possible manner.

In order to ensure there is no further degradation of wetlands, the Rules specify activities which are harmful to wetlands such as industrialisation, construction, dumping of untreated waste, reclamation etc. and prohibit these activities in the wetlands. Other activities such as harvesting, dredging etc may be carried out in the wetlands but only with prior permission from the concerned authorities.
